What does ANPS do?

- ANPS works with the Southwest Rare Plant Task Force to develop strategies for protecting rare species and their habitats.
- ANPS keeps abreast of conservation issues concerning native species and responds to those through our Conservation Committee.
- ANPS promotes the use of native species in residential and commercial landscapes.
- ANPS publishes The Plant Press, supports the publication of scholarly work, and maintains a website with information and links about native plants.
- ANPS hosts a series of local and statewide events that provide forums to learn from professionals.

Arizona Native Plant Society

is a statewide nonprofit organization whose mission is to promote knowledge, appreciation, conservation, and restoration of Arizona native plants and their habitats.

ANPS needs you!

- There are nearly two dozen imperiled plant species under varying degrees of federal status in Arizona, and native plant habitats are disappearing at an alarming rate.
- Invasive species are compromising native plant habitats, can promote fire and loss of species diversity.

You can help by joining us in preserving native plants for future generations by:

- working with home owners, nursery owners, and landscape professionals to incorporate native plants in their projects
- contributing to native plant research
- eradicating nonnative invasive species
- collecting native seeds to use in restoration of native plant habitats
